

Ahmed Raza Khan

Architectural Engineer | Design & Engineering Consultancy | AutoCAD, Revit, SketchUp

Riyadh, Saudi Arabia | Email: ahmed.raza.architect@example.com | Phone: +966 55 123 4567 | LinkedIn: linkedin.com/in/ahmed-raza-architect

Professional Summary

Detail-oriented Architectural Engineer with 6+ years of experience in architectural design, engineering consultancy projects, technical coordination, and authority submission packages. Strong hands-on expertise in AutoCAD, Revit, and SketchUp for concept design, 3D modeling, working drawings, BIM coordination, and client presentations. Experienced with residential villas, commercial offices, mixed-use buildings, and interior fit-out projects in Riyadh and GCC environments. Known for clear communication, accurate documentation, and strong coordination with structural, MEP, and project management teams.

Core Skills

Architectural Design	Engineering Consultancy Projects	AutoCAD 2D Drafting
Revit BIM Modeling	SketchUp 3D Modeling	Working Drawings
Concept Design	Design Development	Authority Submission Drawings
Technical Coordination	Client Communication	Site Coordination
Residential Villas	Commercial Buildings	Interior Fit-out

Professional Experience

Architectural Engineer - Design Axis Engineering Consultancy, Riyadh, Saudi Arabia | Jan 2021 - Present

- Prepared architectural concept designs, design development drawings, and detailed construction drawing packages for residential villas, office spaces, and commercial buildings.
- Developed coordinated architectural models in Revit and presentation models in SketchUp for client meetings, consultant review, and internal coordination.
- Produced accurate AutoCAD plans, elevations, sections, schedules, door/window details, and finishing layouts according to project requirements.
- Coordinated with structural and MEP teams to resolve design clashes and maintain compliance with project scope, consultant comments, and client expectations.
- Supported engineering consultancy submissions by preparing drawing registers, revision records, and complete architectural documentation packages.
- Communicated professionally with clients, project managers, and site teams to clarify design intent, track comments, and close technical issues.

Junior Architectural Engineer - Urban Line Consultants, Lahore, Pakistan | Jul 2018 - Dec 2020

- Assisted senior architects in preparing schematic layouts, municipal submission drawings, interior layouts, and architectural working drawings.
- Created 3D massing studies and visual concepts using SketchUp, with AutoCAD-based plans and Revit models for design review.
- Participated in site visits to verify dimensions, coordinate finishes, and support quality review of architectural works.

Education

Bachelor of Architecture / Bachelor's Degree in Architecture - University of Engineering & Technology, Lahore | 2018

Tools & Software

AutoCAD - Advanced | Revit - Advanced | SketchUp - Advanced | Lumion - Intermediate | Adobe Photoshop - Intermediate | MS Office - Advanced

Selected Projects

- Luxury Villa Design, Riyadh: Complete architectural design package including plans, elevations, sections, Revit model, and client presentation boards.
- Commercial Office Fit-out, Riyadh: Interior layout planning, ceiling coordination, finishes schedule, and shop drawing review support.
- Mixed-use Building Concept: Concept design, massing study, facade options, and consultancy coordination for design development stage.

Role Fit Summary for Screening

Requirement	Candidate Match
Bachelor's Degree in Architecture	Yes - Bachelor of Architecture
Architectural design experience	Yes - 6+ years design experience
Engineering consultancy projects	Yes - consultancy firms and submission packages
AutoCAD	Advanced
Revit	Advanced
SketchUp	Advanced
Good communication skills	Yes - client and consultant coordination
Riyadh role location fit	Yes - currently based in Riyadh
